

ICAO Bans Aircraft

As an extension to the European 'blacklist' of airlines not allowed in European skies, the International Civil Aviation Organisation (ICAO) has gone one step further and banned specific aircraft whose service life

has expired and are no longer considered airworthy' from flying anywhere in the world. ICAO said the decision to ban the aircraft was taken on August 17, in accordance with its Annex 8, Chapter 4

of the Continuing Airworthiness of Aircraft, paragraph 4.2.1.1
